About Me

Hi there! I'm Cikgu Maria, and I'm super passionate about teaching cool stuff like Math and Physics. Imagine learning math in a way that's not boring – that's what I'm all about!

I've been teaching Math for a while now, especially helping students with their SPM Mathematics. You know, those tough math problems? Well, I've got tricks up my sleeve to make them easier. I even have a Bachelor's Degree in Statistics, which is all about numbers and making sense of data.

For more than ten years, I've been a private tutor, helping students with Physics, Mathematics, and Additional Mathematics. I love seeing that "aha" moment when my students grasp a tricky concept. And guess what? I don't just stop there. I've held seminars specifically to help students understand Math better. It's like a big class where we all learn together and have fun doing it!

Teaching isn't just about numbers and equations; it's about making connections and having fun while learning. So, if you want to dive into the world of Math and Physics with someone who makes it exciting and easy to understand, that's me – Cikgu Maria!
